

# Biomes Research Project

In the following project you will be asked to research a biome and create from your findings an informative poster which you will present to the class.

The poster you create must contain the following information: (Tick each box as you complete it!)

- Impressive title/name of biome. ✓
- General description of the biome. ✓
- Average temperature range. ✓
- Average annual precipitation in millimetres (rainfall). ✓
- 2 dominant plants (names + description + pictures or accurate drawings with names). ✓
- 2 dominant animals (names + description + pictures or accurate drawings with names). ✓
- 3 countries that contain the biome. ✓
- 3 unique characteristics/facts about organisms or biome. ✓
- Must include 6 pictures/images. ✓
- Human impacts on the biome. i.e. what damage or changes have humans had on the biome, and what might be some solutions. ✓
- Neatness/visual appeal. ✓
- Bibliography of sources you used. ✓

Name of Your Biome: Tropical (rainforest)

Names of All Partners: Leon & Robin

**On the next page you have been provided with a blank map of the world.**

You need to add to this map:

- The geographical distribution of your biome.
- An orientation compass.
- The equator line.
- The tropics of Cancer and Capricorn.
- The Arctic and Antarctic circles.

**YOU THEN NEED TO ADD THIS MAP AS PART OF YOUR POSTER!**
